

Appendix 5.2.1

General Recommendations of Disinfection

Article 5.2.4.4

There appears to be a typographical error in the second sentence of the second paragraph. We suggest that the word “affluent” should be changed to “effluent”. The sentence should read: “Diseased aquatic animal, mortality fluids and tissues (viscera, blood, mucus, faeces, **effluent** ~~affluent~~ waters) and the association of them to equipments and workers are risk factors in the transmission of pathogens that could eventually infect healthy aquatic animal populations”.
